# Python for Finance

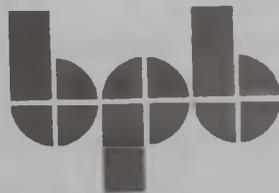

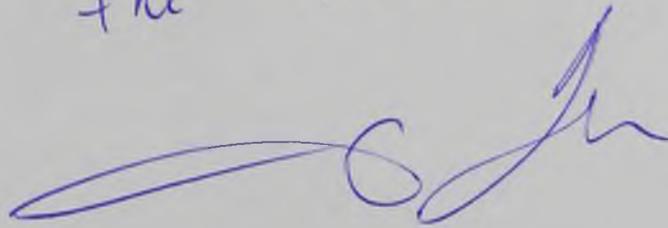

---

*Data analysis, financial modeling, and  
portfolio management*

---

**Dmytro Zherlitsyn**

With best wishes  
to all who read  
the book.

# Table of Contents

<b>1. Getting Started with Python for Finance</b> .....	<b>1</b>
Introduction .....	1
Structure .....	2
Objectives .....	2
Finance principles and contemporary trends in data analysis.....	2
<i>Financial investor</i> .....	4
<i>Financial market institutions</i> .....	4
<i>Two critical finance categories</i> .....	5
<i>Financial data analysis</i> .....	6
Comparing analytical tools for various programming languages.....	7
<i>Python programming language advantages</i> .....	10
<i>The role of Python in finance</i> .....	11
Python instruments are ready for data analysis.....	12
Installing Python on a local PC .....	14
<i>Installation procedure</i> .....	14
<i>Post-installation setup and configuration</i> .....	14
<i>Managing non-standard packages</i> .....	16
Python IDEs .....	17
<i>Spyder</i> .....	17
<i>Jupyter Notebook</i> .....	18
Easy start with Python in the cloud .....	19
Python libraries for finance .....	20
<i>Installation of essential libraries for data manipulation and data analysis</i> .....	24
Python essentials.....	27
<i>Syntax principals and Python code style</i> .....	28
<i>Basic operators</i> .....	29
<i>Control flow and simple output</i> .....	29
<i>Python basic data structures</i> .....	31

<i>Types for data analysis</i> .....	31
Conclusion .....	32
Questions.....	33
Key terms .....	34
References.....	34
<b>2. Python Tools for Data Analysis: Primer to Pandas and NumPy</b> .....	<b>35</b>
Introduction .....	35
Structure .....	35
Objectives .....	36
Creation and manipulation of Python data structures.....	36
<i>Basic data manipulations and computations within Python built-in data structures</i> ...	36
<i>Calculating operations for data analysis and rate of returns</i> .....	38
Defining custom functions for data analysis.....	41
NumPy for data analysis.....	43
<i>Creating NumPy arrays</i> .....	43
<i>Sorting and sorting by arguments</i> .....	45
<i>Adding and removing data</i> .....	46
<i>Array shape manipulation</i> .....	47
<i>Find values and filtering operations</i> .....	49
<i>Arithmetical and statistical operations</i> .....	51
Working with Pandas for data analysis .....	54
<i>Creating series and DataFrame</i> .....	55
<i>Indexing, finding and filtering data</i> .....	56
<i>Data manipulation</i> .....	63
Conclusion .....	70
Questions.....	71
Key terms .....	72
References.....	72
<b>3. Financial Data Manipulation with Python</b> .....	<b>73</b>
Introduction .....	73
Structure .....	73

---

Objectives .....	74
Financial Data World: Sources and valuation aspects .....	74
Yahoo Finance to access financial market data .....	75
Working with diverse file formats .....	82
<i>Excel data file format with Pandas</i> .....	83
<i>Comma-separated value data file format with Pandas</i> .....	85
Open data sources and Python library for fetching data .....	89
Low-level APIs and web-scraping.....	98
<i>Binance cryptocurrency exchange example</i> .....	98
<i>Web scraping and BeautifulSoup Python library</i> .....	101
Conclusion .....	102
Questions.....	103
Key terms .....	104
Further reading.....	104
<b>4. Exploratory Data Analysis for Finance .....</b>	<b>105</b>
Introduction .....	105
Structure .....	105
Objectives .....	106
Basic patterns for processing raw financial data .....	106
<i>Data importing and structuring DataFrame</i> .....	107
<i>Elementary data-clearing patters</i> .....	110
<i>Data transformation and creation of new features</i> .....	113
EDA essentials for financial analysis.....	116
<i>Descriptive statistics</i> .....	117
<i>Basic statistical data visualization</i> .....	121
<i>Moving average in financial analysis</i> .....	126
Basics of correlation analysis.....	128
Conclusion .....	132
Questions.....	133
Key terms .....	133
References.....	134

<b>5. Investment and Trading Strategies .....</b>	<b>135</b>
Introduction .....	135
Structure .....	136
Objectives .....	136
Investment strategies on the financial assets markets .....	136
Fundamental analysis.....	140
Graphical analysis with Python.....	144
<i>Basic stock graphics tools</i> .....	145
<i>Graphical analysis patterns</i> .....	151
Technical analysis metrics and tools .....	152
Conclusion .....	159
Questions.....	160
Key terms .....	160
References.....	160
<b>6. Asset Pricing and Portfolio Management.....</b>	<b>161</b>
Introduction .....	161
Structure .....	161
Objectives .....	162
Allocation of financial assets and core metrics with Python .....	162
Portfolio theory and diversification .....	170
<i>Markowitz's Portfolio Theory and its modifications</i> .....	173
<i>Model 6.1: Risk minimization strategy</i> .....	174
<i>Model 6.2: Rate of Return maximization strategy</i> .....	174
<i>Model 6.3: Sharpe Rate maximization strategy</i> .....	175
<i>Modifications of the original Markowitz's Portfolio Theory</i> .....	175
<i>Simulations method for estimated optimal asset allocation</i> .....	176
<i>Mathematical optimization method with Python</i> .....	180
Regressions and Capital Asset Pricing Model fundamentals.....	185
<i>Python libraries for regression analysis</i> .....	186
<i>Python tools for CAPM assessment</i> .....	190
Conclusion .....	192

---

Questions.....	193
Key terms .....	194
References.....	194
<b>7. Time Series Analysis and Financial Data Forecasting.....</b>	<b>195</b>
Introduction .....	195
Structure .....	196
Objectives .....	196
Time series analysis: Core principles and concepts .....	196
<i>Pandas toolkits for time series data analysis</i> .....	201
Traditional forecasting methods and models.....	203
<i>The statsmodels toolkits for time series analysis</i> .....	205
<i>Errors statistical metrics: MAPE, MSE, MAE</i> .....	207
Exponential smoothing and Holt-Winters model .....	209
<i>Seasonality decomposition in Python</i> .....	212
<i>The Holt-Winters method: Multiplicative trend and seasonal components</i> .....	214
ARIMA approach: From moving averages to seasonality and external variables ...	215
<i>Stationarity test</i> .....	216
<i>Autocorrelation and partial autocorrelation functions</i> .....	218
<i>Custom ARIMA model estimation</i> .....	220
<i>SARIMA and SARIMAX models</i> .....	223
Conclusion .....	228
Questions.....	228
Key terms .....	229
References.....	229
<b>8. Risk Assessment and Volatility Modelling.....</b>	<b>231</b>
Introduction .....	231
Structure .....	232
Objectives .....	232
Probability theory basics.....	232
<i>Normal distribution</i> .....	234
Value at risk metric for risk assessment in finance .....	240

Monte Carlo method in finance .....	247
<i>Geometric Brownian motion method for price prediction</i> .....	249
<i>Option pricing: The Black-Scholes formula</i> .....	254
ARCH and GARCH models .....	261
<i>Model fitting and diagnostic checking</i> .....	268
Conclusion .....	271
Questions.....	272
Key terms .....	272
References.....	273
<b>9. Machine Learning and Deep Learning in Finance .....</b>	<b>275</b>
Introduction .....	275
Structure .....	275
Objectives .....	276
Machine Learning concept.....	276
<i>Machine learning models</i> .....	277
<i>The universal algorithm of Machine Learning</i> .....	279
Python ML libraries and tools.....	280
<i>Scikit-learn Python library</i> .....	280
<i>XGBoost and LightGBM libraries</i> .....	284
ML models for financial data.....	287
<i>Clustering analysis of financial data</i> .....	287
<i>Forecasting stock prices</i> .....	291
Conclusion .....	297
Questions.....	297
Key terms .....	298
References.....	299
<b>10. Time Series Analysis and Forecasting with FB Prophet Library .....</b>	<b>301</b>
Introduction .....	301
Structure .....	301
Objectives .....	302
Prophet essentials.....	302

---

Forecasting with Prophet .....	307
<i>Seasonality parameters of Prophet's models</i> .....	307
<i>Changepoints adjusting</i> .....	314
Additional regressors .....	317
Cross-validation and hyperparameter tuning .....	320
<i>Cross-validation and prevent overfitting</i> .....	320
<i>Hyperparameters tuning</i> .....	323
Conclusion .....	327
Questions.....	327
Key terms .....	327
References.....	328
<b>Appendix A: Python Code Examples for Finance</b> .....	<b>329</b>
Creating PythonFinance virtual environment .....	329
Importing libraries .....	330
Fetching stock prices data from Yahoo Finance.....	331
Fetching other data from Yahoo Finance .....	334
Technique analyses indices (talib library) .....	336
Graphical analyses (core libraries).....	337
Graphical analyses (mplfinance library).....	338
Portfolio optimization (scipy library) .....	340
Statsmodels regression .....	342
Time series data featuring.....	344
SARIMAX parameters tuning (pmdarima library) .....	345
Calculate and plot VAR and aVAR.....	347
GARCH models (arch library) .....	348
Prophet library: Model parameters define, hyperparameters tune with cross-validation .....	350
<b>Appendix B: Glossary</b> .....	<b>353</b>
<b>Appendix C: Valuable Resources</b> .....	<b>359</b>
<b>Index</b> .....	<b>361-367</b>
